Currently learning Java Full Stack Development using Java, HTML, CSS, JavaScript, SQL, and J2EE through hands-on projects to strengthen frontend and backend development skills.	

PROJECTS

Human Activity Recognition using Machine Learning

Developed a machine learning model using SVM, Random Forest, CNN, and RNN algorithms to classify human activities. Performed data preprocessing, feature extraction, model training, and evaluation to improve prediction accuracy.

Secure Question Paper Leakage Prevention System using Blockchain

Designed a blockchain-based secure examination system with time-lock access and OTP authentication. Implemented encrypted decentralized storage to ensure secure, transparent, and tamper-proof handling of examination papers.
